There is a class of drugs called bisphosphonates used to treat osteoporosis, osteosarcoma or post-menopausal bone loss. There is a risk of osteonecrosis (bone death) of the jaw with extractions and other dental treatments that expose the patient's bone with these drugs. Therefore, are you taking or have you ever taken: (Please CIRCLE the drug if you have)

- Fosomax
- Actonel
- Boniva
- Aredia
- Zometa
- Or another bisphosphonate ?
